Many of us have had metal detectorists on our land..some legal, some not so! If you care about the land and it's heritage, it's important that you only let people registered with the **National Council for Metal Detecting** onto your land. There are stringent rules in relation to 'finds' and strict rules of conduct. Also they will come in and legally survey any land before development occurs..and artefacts and valuable items lost forever under concrete!

Through our insurance products and services, we are here to protect you and your farming business against a range of risks.

For 120 years we've been putting farmers across the South West at the heart of what we do. To our Members, we're the local specialists that understand the challenges you face and are here to help.

From your very first conversation with us, to the moment a claim is paid out, we'll always do the right thing by you. But don't just take our word for it – ask your neighbours about us.
