AUCTIONEERS FORWARD

This most genuine of Herd dispersals arises upon the decision of Mrs A Pitman to sell her excellent small herd of Pedigree Devon's which were her and her late husband's pride and joy.

They had a clear TB test on 01/04/19. The calves have been both notified but not registered. All are 12 month and older are BVD vaccinated and Farm Assured.

None of the heifers have been to the bull. All Heifer calves at foot have been birth notified, and are therefore eligible for registration.

VETERINARY REPORT

Prepared by Damory Veterinary Clinic – Blandford Forum Dorset

With reference to the Devon Suckler Herd at Dunbury Hill Farm, Winterborne Stickland (Holding 11/027/0028) – owned by Mrs A. Pitman.

No evidence of IBR or Leptospirosis has been diagnosed in the cattle, a youngstock screen (ten 9 -18 month old homebred cattle are blood tested) has been performed most years with the last one done in March 2017, results have always been negative for Leptospirosis & IBR.

All breeding cattle have been vaccinated for BVD using Bovela in April 2019, and all cattle have been screened negative for BVD PI status by PCR testing either by blood test or "Tag and Test"

Signed Matthew Burge BVetMed (Hons)MRCVS
