## **LEIGH FARM LTD, BISHOPS WALTHAM**

Welcome to Frome Market and this genuine dispersal of dairy cattle on behalf of the Leigh Family, Locks Farm, Bishop Waltham. The sale arises due to a change in farming policy and their decision to cease milk production and expand the arable portion of their business. The dams are commercially managed and are a good Frisian Holstein type with size and stature, the majority are home bred, although, some purchases have been made over the past 2 years as it has been run on a more flying herd basis. Originally milked through a herringbone parlour, Lely Mk 4 robots were introduced approximately 6 years ago. The herd are cubicle housed through the winter months with a modest ration of concentrates fed at milking, further winter supplements are a mix of maize, grass silage and protein ration. The herd are grazed on well managed leys during the summer months. An "all year" calving pattern has been established with selected dams from the main herd being served to sexed semen Holstein Frisian and all running with Pedigree Hereford name sire sweeper "Potkilm 1 Jumbo". The Friesian Holstein in calf heifers are home bred and were PD+ on Wednesday 21st April to Potkilm 1 Jumbo Hereford stock sire and are due July/August 2021. The herd has been removed to Frome Market for convenience of sale.

Tb testing is annually and a clear annual test was achieved on the 6th April 2021.

The herd is monitored for Johnes, BVD, Lepto Spirosis, Lungworm and Fluke and the cows are all currently clear.

Herd average 7,500 litres      Cell Count 99 (those given in the sale)

- 1026 **(2nd) British Friesian Cow**  
Ear: UK282119 501015 **(ID 21)** Born: 08/08/2017
