BLUE TONGUE UPDATE WEDNESDAY 14th MAY

DEFRA have extended the temporary easing of pre-movement testing for Blue tongue for non-breeding livestock leaving the restricted zone. Specific licence EXD632 is still required but non-breeding cattle, goats and sheep over 60 days can now move without a BT pre-movement test. Only the following animals still require testing:

- Entire males intended for breeding
- Pregnant females (or pregnancy status unknown)
- Stock aged 60 days or younger (unless travelling at foot with the maternal dam where the maternal dam should be tested by PCR and ELISA)

This is a temporary change that will apply until 30th June 2025. DEFRA reserve the right to withdraw the extension at any time should new disease be confirmed.

DM, PM & AD DRAKE, EAST KNOYLE

The heifers on offer today are of a very good British Friesian type and are the second consignment of youngstock following the herd dispersal which was held in January 2024. The herd has been closed for a number of years and the heifers are home bred, BVD free, vaccinated for salmonella as calves and both cubicle and electric fence trained.

Seven of the heifers were sired by Lakemead Jingle, the remainder are granddaughters of Dungormley Chad Jacob, a stock sire home bred from a 5th lactation 8,500 litre cow which was sired by Moorcroft Milton.

The heifers are in good condition and are an excellent example of their type. All are due to a son of Lakemead Jingle from September onwards. PD due dates shown are as testing on 11th June. Pre-movement TB test was carried out on the 2nd June 2025.
