Several quality Continental heifers coming forward with regular vendors AE Weaver & Son seeing prices 360-365p/kg topping at 367.5p/kg for Blue heifers. A super consignment from Malcolm and Abby Robinson saw best Blonde x heifers to 366.5p/kg grossing over £2500! Leaner types and over age cattle more difficult to place this week however the strong deep bodied types with good cover from the Groves family still grossing £2000-£2200.

CULL COWS/OTM'S (13) to 298p/kg and £2369

AUCTIONEER: TREVOR ROWLAND 07968 480401 Start 12.30pm

Surprisingly a lot less cull cows forward today considering the blue tongue licences have been abolished. But also very much a harvest week as vendors busy with hay etc.

Plain cows generally 170-200ppk with a few boners 120-140ppk. A few over fat cows had a strong trade 257.5ppk settling at £2369. Good export cows £1600-£1800 with more needed. A super Blue cow from JH & ACL Williams topped at just under 300ppk attracting good competitive bidding. More cows needed in all classes.

Vendors please give me or the office a call on a Tuesday with expected entries so I can inform buyers to get them to attend.

Text or WhatsApp is fine 07968 480401 Trevor Rowland.

IMPORTANT REMINDER! Please remember you **do not** have to TB test barren cows. We have an **untested** section so cattle can come straight off the holding to market.

Vaccinations: Whole herd vaccinations to regular youngstock vaccinating, reminders, deliveries, and administration.

Scoring: Mobility, Condition, Rumen: Our VetTech is a ROMS trained mobility scorer, providing you with a clear and simple report helping to improve herd health and meet the increasing standards demanded by Red Tractor and many milk contracts. Each report shows the progress since the last assessment and problem cows are clearly identified for treatment if required.

India Scot-Dalglish Our
New VetTech

Calf Routines: are new services we are offering for youngstock. These include growth checks/calf weighing, disbudding, vaccinations, colostrum immunity testing and reports. These routines ease your workload and ensure youngstock are getting quality and regular care, keeping every animal up to date with disbudding and vaccinations and taking the pressure off you. You can make use of these services at a frequency that works for your farm e.g. weekly, fortnightly or monthly.

Fly control: We have a new way to deal with the pesky flies that drive us all mad every year.

Clover Friendly Flies are pteromalid wasps, also known as fly parasites. They attack fly larvae, reducing the number of larvae that turn in to flies. This is a sustainable approach to fly control, leading to less fly treatment being needed for your animals and in the parlour.

Small Holder Services: We are offering full detailed health calendars and services to help our smallholders stay on top of routine treatments, such as hoof care, vaccinations, faecal egg counts, worming and much more. Our VetTech will provide regular reminders for routine interventions and can attend your holding to give any help needed in administering treatment.

Samples: Our VetTech is trained to collect a variety of samples for diagnostic testing e.g.

Faecal egg counts, bloods, milk samples for disease identification and will issue reminders for routine testing.

Anything else?

Or if you just need extra hand for few hours, whether that is needing extra labour for your tb test, vaccinating, or even just getting sheep in from the field ready for lambing, give us a shout and we might be able to help. It can save you paying someone for all day or if you're struggling for staff.

into a life taking condition? We in the farming community are particularly (due to
