UTM STEERS (44) Max. 439.5p/kg UTM HEIFERS (36) Max. 759.5/kg

This week saw our annual Christmas fatstock show and sale at Frome market. The show and sale was extremely well supported and, while a full sale report and results are available separately, I can confirm it was an outstanding day and trade for the high-quality show cattle on offer was excellent. The supreme champion beast of the show was an outstanding Aberdeen Angus heifer from local vendor Stuart Perkins of H G Perkins and Son which sold for a record price of 760p/kg, grossing almost £5000 and purchased by Mr Steve Tucker on behalf of the White Row Farm Shop. Reserve champion was a lovely Charolais heifer from regular show supporter Laura Bodman and her family; this sweet butcher's heifer topped at an excellent 570p/kg being purchased by the judge Mr Ed Davis. A good total entry of over 75 head came through the ring seeing 50 show cattle and 25 commercials. Commercial trade varied according to quality but some strong prices maintained for the Christmas trade. Plenty of good unhandled continental steers 400 – 440p/kg which saw Laura Bodman, Steve & Rachel Stamp and Mark & Kate Lanfear all at 439.5p/kg. Deep bodied Limousin steers from Richard & Londene Garraway and Malcolm & Abbey Robinson both at 369.5p/kg, with good Angus steers from H G Perkins & Son also at 369.5p/kg (£3000). Leaner 20mo Hereford steers coming from Austin Smith were at 361.5p/kg. Suckler bred 'R' grade heavy steers from CR Hartley settled at 354.5p/kg while young Angus steers at just 18mo from A E Weaver & Son achieved 354.5p/kg. Certainly a good day for heifers with some great animals forward, smart Limousin again from the Robinson family topping at 364.5p/kg grossing £2600. Nice handy weight heifers from Rob Singleton and family always wanted at 357.5p/kg. Overall, a tremendous day and a big thank you to all who supported the sale.

Vaccinations: Whole herd vaccinations to regular youngstock vaccinating, reminders, deliveries, and administration.

Scoring: Mobility, Condition, Rumen: Our VetTech is a ROMS trained mobility scorer, providing you with a clear and simple report helping to improve herd health and meet the increasing standards demanded by Red Tractor and many milk contracts. Each report shows the progress since the last assessment and problem cows are clearly identified for treatment if required.

Jade Scott-Dalglish Our
New VetTech

Calf Routines: are new services we are offering for youngstock. These include growth checks/calf weighing, disbudding, vaccinations, colostrum immunity testing and reports. These routines ease your workload and ensure youngstock are getting quality and regular care, keeping every animal up to date with disbudding and vaccinations and taking the pressure off you. You can make use of these services at a frequency that works for your farm e.g. weekly, fortnightly or monthly.

Fly control: We have a new way to deal with the pesky flies that drive us all mad every year. Clover Friendly Flies are pteromalid wasps, also known as fly parasites. They attack fly larvae, reducing the number of larvae that turn in to flies. This is a sustainable approach to fly control, leading to less fly treatment being needed for your animals and in the parlour.

Small Holder Services: We are offering full detailed health calendars and services to help our smallholders stay on top of routine treatments, such as hoof care, vaccinations, faecal egg counts, worming and much more. Our VetTech will provide regular reminders for routine interventions and can attend your holding to give any help needed in administering treatment.

Samples: Our VetTech is trained to collect a variety of samples for diagnostic testing e.g.

Faecal egg counts, bloods, milk samples for disease identification and will issue reminders for routine testing.

Anything else?

Or if you just need extra hand for few hours, whether that is needing extra labour for your tb test, vaccinating, or even just getting sheep in from the field ready for lambing, give us a shout and we might be able to help. It can save you paying someone for all day or if you're struggling for staff.

Vets in Northern Ireland are pledging help to support farmers Health...FCN are collaborating with them in this, together with Macmillan Cancer support.. I've always thought that in their position visiting farms that vets are in a unique place to help in this area? If successful it could be extended UK wide....

Tree planting has had alot of farming press hasn't it!? Whilst the principle is laudible there are not (as yet)the details available and problems such as the shortage of foresters and supporting finance etc. Also, We cannot end up losing productive farmland and reducing climate friendly food production which will only increase our reliance on imports from countries with much lower environmental credentials!? Recreational based activities are, as ever popular though!? I must get half a dozen ask me every year if I can sell them some land to plant trees on!? Our National NFU has been busy as usual on our behalf! Earlier in the year our President got an assurance from the Prime Minister re animal imports and trade in meat products that our food Safety Welfare and Hygiene Standards would Not be compromised within any Trade agreements! We are to be proud of what they have achieved in this area and hope beyond hope that the government don't renege on these promises 😞

Teaching our children about food production is so important! During British Science week 1600 schools took part, and learned first hand from those that grow food how important core classroom science topics are across Agriculture. To be more communicable to children, the YFC ambassadors were involved with this teaching. Find out more at education.nfuonline

Blessings and encouragement to you all,until we meet again,God Willing 🙌🙏
