Vaccinations: Whole herd vaccinations to regular youngstock vaccinating, reminders, deliveries, and administration.

Scoring: Mobility, Condition, Rumen: Our VetTech is a ROMS trained mobility scorer, providing you with a clear and simple report helping to improve herd health and meet the increasing standards demanded by Red Tractor and many milk contracts. Each report shows the progress since the last assessment and problem cows are clearly identified for treatment if required.

Indie Scot-Dalglish Our
New VetTech

Calf Routines: are new services we are offering for youngstock. These include growth checks/calf weighing, disbudding, vaccinations, colostrum immunity testing and reports. These routines ease your workload and ensure youngstock are getting quality and regular care, keeping every animal up to date with disbudding and vaccinations and taking the pressure off you. You can make use of these services at a frequency that works for your farm e.g. weekly, fortnightly or monthly.

Fly control: We have a new way to deal with the pesky flies that drive us all mad every year. Clover Friendly Flies are pteromalid wasps, also known as fly parasites. They attack fly larvae, reducing the number of larvae that turn in to flies. This is a sustainable approach to fly control, leading to less fly treatment being needed for your animals and in the parlour.

Small Holder Services: We are offering full detailed health calendars and services to help our smallholders stay on top of routine treatments, such as hoof care, vaccinations, faecal egg counts, worming and much more. Our VetTech will provide regular reminders for routine interventions and can attend your holding to give any help needed in administering treatment.

Samples: Our VetTech is trained to collect a variety of samples for diagnostic testing e.g.

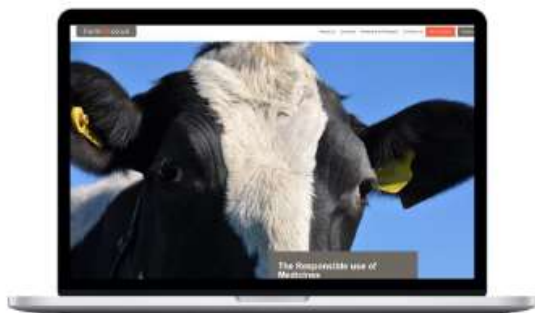

Faecal egg counts, bloods, milk samples for disease identification and will issue reminders for routine testing.

Anything else?

Or if you just need extra hand for few hours, whether that is needing extra labour for your tb test, vaccinating, or even just getting sheep in from the field ready for lambing, give us a shout and we might be able to help. It can save you paying someone for all day or if you're struggling for staff.

'As long as the Earth endures, Seedtime and Harvest, Cold and Heat, Summer and Winter, Day and Night, Shall Never Cease'(Genesis 8:22)

Rogation Sunday was on 10 May. It comes from Latin word Rogare..which means to ask! During this time we ask for God's Blessing on the sowing of the crops to be Harvested in Autumn, on those communities close to the land, and All who work in Agriculture and related jobs!

Consumer demand is strong for Organic Products...I am guessing the fuel/fertilizer crisis may be encouraging this now? Last year was up 7.3pc But Organic Livestock numbers decreased across board (except for laying poultry) Could we feed the nation on home grown food if too much land goes over to Organic, without importing more?

Almighty God, It is your Will that the Earth and sea should bear much and sufficient fruit in due season. Please Bless the Labours of those who work on land and sea; Grant good harvests and the Grace to Acknowledge your Fatherly Care and Provision, Through Jesus Christ Our Lord, Amen.
