UTM STEERS (28) Max. 347.5p/kg UTM HEIFERS (25) Max. 357.5p/kg

Great to see 60 finished cattle penned for sale this week. The heavier cattle looked a little less on the week per kilo, however, 'weight in money' and plenty of quality 'R & U' grade Limousin steers and heifers from RW & MA Loxton over £2300 and topped at £2507!! A nice consignment from Edward and Lucy Hicks saw their Simmental steers 334.5p/kg and over £2300. Charolais from the same home 341.5p/kg. Native thick butchers steers produced firm demand with O+ tidy Angus steers from Roger Coombes and family at 334.5p/kg. Grand South Devon steers from James Burrough sold well 341.5p/kg (£2300). Dairy (non breeder) black and white heifer to 317p/kg. Non assured cattle a little hard to place generally 290-310p/kg. Well fleshed continental heifers produced the highest prices per kilo this week with smart Limousin from Edward and Lucy Hicks 357.5p/kg closely followed by Andrew Loxtons Limousin at 354.5p/kg. Light weight Angus heifers generally 310-330p/kg but most O+ and O- grades this week.

PRIME LAMBS (579) Max 402p/kg & £220

A superb entry of lambs in terms of numbers, however a lot of lambs were very lean and some would have been better sold in the stores. Keep feeding the lambs as there is no goodness in the grass. Handy weights to 364p/kg from Isla Watts and £162 from Gerald Williams. Heavies to 402p/kg from Stuart Coombes of Bridgwater and £202 from the same good home. Over 52kg to 387p/kg from Jonathan Sprake & Partners and £220 from the Lyons family. Vaccinations: Whole herd vaccinations to regular youngstock vaccinating, reminders, deliveries, and administration.

Scoring: Mobility, Condition, Rumen: Our VetTech is a ROMS trained mobility scorer, providing you with a clear and simple report helping to improve herd health and meet the increasing standards demanded by Red Tractor and many milk contracts. Each report shows the progress since the last assessment and problem cows are clearly identified for treatment if required.

Jade Scott-Dalglish Our
New VetTech

Calf Routines: are new services we are offering for youngstock. These include growth checks/calf weighing, disbudding, vaccinations, colostrum immunity testing and reports. These routines ease your workload and ensure youngstock are getting quality and regular care, keeping every animal up to date with disbudding and vaccinations and taking the pressure off you. You can make use of these services at a frequency that works for your farm e.g. weekly, fortnightly or monthly.

Fly control: We have a new way to deal with the pesky flies that drive us all mad every year. Clover Friendly Flies are pteromalid wasps, also known as fly parasites. They attack fly larvae, reducing the number of larvae that turn in to flies. This is a sustainable approach to fly control, leading to less fly treatment being needed for your animals and in the parlour.

Small Holder Services: We are offering full detailed health calendars and services to help our smallholders stay on top of routine treatments, such as hoof care, vaccinations, faecal egg counts, worming and much more. Our VetTech will provide regular reminders for routine interventions and can attend your holding to give any help needed in administering treatment.

Samples: Our VetTech is trained to collect a variety of samples for diagnostic testing e.g.

Faecal egg counts, bloods, milk samples for disease identification and will issue reminders for routine testing.

Anything else?

Or if you just need extra hand for few hours, whether that is needing extra labour for your tb test, vaccinating, or even just getting sheep in from the field ready for lambing, give us a shout and we might be able to help. It can save you paying someone for all day or if you're struggling for staff.
